What makes this opportunity different?

Salus is a friendly, professional, employee-owned company, run by experienced Registered Building Inspectors for the benefit of its people. We are a highly respected Registered Building Control Approver with many long-serving colleagues and a collaborative culture where employee contributions are valued and rewarded through shared success.

We are committed to supporting colleagues at every stage of their career. We develop talent from within and actively support progression, including clear routes into senior management and future leadership roles for those who wish to follow that path.

About Salus

Salus is a national Registered Building Control Approver with over 23 years' experience delivering building control and fire safety services. More than 95% of our work is in the commercial sector.

Following our transition to an Employee Ownership Trust in 2025, we have restructured our leadership team and continue to see strong demand for our services.

As a result, we are looking to appoint an Associate Director who is a Registered Building Inspector (RBI) to our senior leadership team.

What does employee ownership mean for you?

Salus is owned on behalf of its employees through an Employee Ownership Trust. This provides long-term stability, with no exit plans, private equity ownership or short-term disruption. It also gives employees a shared stake in the company's success, with company performance benefiting employees collectively.

RBIs have professional independence, with decisions guided by safety, compliance and quality and the opportunity for long-term career development, focused on developing people rather than simply filling roles.

Ready for a new challenge?
